ABSTRACT

**Ema Yusmita Siregar, 2026 : The Effect of Beelinguapp Media
towards Reading Comprehension of the Eighth-Grade Students' at MTsN
6 Agam.**

This research aimed to determine whether there was a significant effect of using Beelinguapp media on the eighth-grade students' reading comprehension of descriptive texts at MTsN 6 Agam. This research employed a quantitative approach with a quasi-experimental design using the Non-Equivalent Control Group Design. The population consisted of all eighth-grade students of MTsN 6 Agam in the 2026/2027 academic year. The sample consisted of one experimental class and one control class selected by using Cluster Random Sampling. The experimental class was taught by using Beelinguapp media through an LCD projector integrated with the KWL strategy, while the control class was taught by using the same KWL strategy with conventional learning media. The research instrument was a reading comprehension test consisting of 20 multiple-choice items administered as a pre-test and a post-test. The data were analyzed using descriptive statistics, the Shapiro–Wilk normality test, Levene's homogeneity test, and the Independent Samples t-test. The results showed that the mean score of the experimental class increased from 57.50 in the pre-test to 81.25 in the post-test, while the mean score of the control class increased from 55.78 to 65.78. The Independent Samples t-test revealed that the significance value (Sig. 2-tailed) was 0.000, which was lower than 0.05 ($0.000 < 0.05$). Therefore, the null hypothesis (H_0) was rejected, and the alternative hypothesis (H_a) was accepted. It can be concluded that the use of Beelinguapp media had a significant effect on the eighth-grade students' reading comprehension of descriptive texts at MTsN 6 Agam.

Keywords: Beelinguapp, Reading Comprehension, Descriptive Text.

ABSTRAK

Ema Yusmita Siregar, 2026 : Pengaruh Penggunaan Aplikasi Beelinguapp terhadap Kemampuan Membaca Pemahaman Siswa Kelas VIII di MTsN 6 Agam.

Penelitian ini bertujuan untuk mengetahui apakah terdapat pengaruh yang signifikan dari penggunaan media Beelinguapp terhadap kemampuan membaca pemahaman teks deskriptif siswa kelas VIII di MTsN 6 Agam. Penelitian ini menggunakan pendekatan kuantitatif dengan desain kuasi-eksperimen menggunakan Non-Equivalent Control Group Design. Populasi penelitian terdiri dari seluruh siswa kelas VIII MTsN 6 Agam pada tahun ajaran 2026/2027. Sampel penelitian terdiri dari satu kelas eksperimen dan satu kelas kontrol yang dipilih menggunakan Cluster Random Sampling. Kelas eksperimen diajar menggunakan media Beelinguapp melalui LCD yang diintegrasikan dengan strategi KWL, sedangkan kelas kontrol diajar menggunakan strategi KWL yang sama dengan media pembelajaran konvensional. Instrumen penelitian berupa tes kemampuan membaca pemahaman yang terdiri dari 20 soal pilihan ganda yang diberikan sebagai pre-test dan post-test. Data dianalisis menggunakan statistik deskriptif, uji normalitas Shapiro-Wilk, uji homogenitas Levene, dan Independent Samples t-test. Hasil penelitian menunjukkan bahwa nilai rata-rata kelas eksperimen meningkat dari 57,50 pada pre-test menjadi 81,25 pada post-test, sedangkan nilai rata-rata kelas kontrol meningkat dari 55,78 menjadi 65,78. Hasil Independent Samples t-test menunjukkan bahwa nilai signifikansi (Sig. 2-tailed) adalah 0,000, yang lebih kecil dari 0,05 ($0,000 < 0,05$). Oleh karena itu, hipotesis nol (H_0) ditolak dan hipotesis alternatif (H_a) diterima. Dapat disimpulkan bahwa penggunaan media Beelinguapp memberikan pengaruh yang signifikan terhadap kemampuan membaca pemahaman teks deskriptif siswa kelas VIII di MTsN 6 Agam.

Kunci: Beelinguapp, Pemahaman Membaca, Teks Deskriptif.
